Aishwarya Jadhav

Full Stack Java Developer

Email : jadhavgaishwarya2003@gmail.com **GitHub** : https://github.com/aish2605
Phone : 7620833506 **LinkedIn** : linkedin.com/in/aishwarya-jadhav-706279304

Career Objective

Motivated Full Stack Java Developer with hands-on experience in building scalable web applications using Java, Spring Boot, React, and MySQL. Recently expanded skills into Generative AI and AI Agents, focusing on building intelligent, AI-powered applications. Seeking an entry-level role to contribute to innovative projects and grow as an AI-driven software developer.

Technical Skills

- **Backend:** Java , Spring Boot , REST APLs , JDBC , Servlet , Filter , JSP , MVC.
- **Frontend:** React JS, HTML, CSS, JavaScript, Tailwind CSS , Bootstrap , API
- **Database:** MySQL, Hibernate (Basic),Oracle
- **AI Skills :** Ai Agents , Generative AI , Prompt Engineering
- **Tools:** Git, GitHub, Postman, Jira, Copilot, VS Code, Eclipse / STS ,Maven ,Gradle, Figma ,Docker
- **Concepts:** OOP**,**MVC Architecture, CRUD Operations, Client–Server Architecture

Languages: English ,Hindi , Marathi

Training / Certification

1. **Full Stack Java Developer – Training Program – Naresh IT | 2025**

2. **AI Agents In Java with Generative AI -Coursera (Vanderbilt University) | 2026**

3. **Front End Developer Internship – Cognifyz technology | 2026**

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript
- Built reusable UI components using React JS
- Integrated REST APIs for dynamic data rendering
- Used Git & GitHub for version control and project management
- Technologies Used: HTML, CSS, JavaScript, React JS

Projects

Car Rental Management System

Tech Stack: React JS, Spring Boot, MySQL

Developed a full-stack web application that allows users to view available cars, make bookings, and manage rentals. The application includes user authentication and role-based access for admin and users, RESTful APIs for handling car, user, and booking operations, and seamless frontend–backend integration using React and Spring Boot. Data is stored and managed in a MySQL database with complete CRUD functionality.

CookFlow – Recipe Management Application

Tech Stack: React JS

Created a ReactJS application to display and manage recipes. The project uses React components, hooks, and props to show recipe data and update the UI. It focuses on simple design and user-friendly interaction.
