

Aishwarya Jadhav

Full Stack Java Developer

Email : jadhavgaishwarya2003@gmail.com **GitHub** : <https://github.com/aish2605>
Phone : 7620833506 **LinkedIn** : [linkedin.com/in/aishwarya-jadhav-706279304](https://www.linkedin.com/in/aishwarya-jadhav-706279304)

Career Objective

Motivated Full Stack Java Developer with hands-on experience in building scalable web applications using Java, Spring Boot, React, and MySQL. Recently expanded skills into Generative AI and AI Agents, focusing on building intelligent, AI-powered applications. Seeking an entry-level role to contribute to innovative projects and grow as an AI-driven software developer.

Technical Skills

- **Backend:** Java , Spring Boot , REST APLs , JDBC , Servlet , Filter , JSP , MVC ,Thymeleaf, Junit.
- **Frontend:** React JS, HTML, CSS, JavaScript, Tailwind CSS , Bootstrap , API,ARIA ,UI/UX ,Jest .
- **Database:** MySQL, Hibernate (Basic),Oracle .
- **AI Skills** : Ai Agents , Generative AI , Prompt Engineering ,LLM ,Open API ,Gemini API.
- **Tools:** Git, GitHub, Postman, Jira, Copilot, VS Code, Eclipse / STS ,Maven ,Gradle, Figma ,Docker , ESLint ,Prettier , PlayWright ,JIRA MCP,
- **Concepts:** OOP,MVC Architecture, CRUD Operations, Client–Server Architecture

Languages: English ,Hindi , Marathi

Training / Certification

1. Full Stack Java Developer – Training Program – Naresh IT | 2025
 2. AI Agents In Java with Generative AI -Coursera (Vanderbilt University) | 2026
 3. Front End Developer Internship – Cognifyz technology | 2026
- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript and React JS
 - Built reusable UI components using React JS
 - Integrated REST APIs for dynamic data rendering
 - Used Git & GitHub for version control and project management

Projects

1.AI Chatbot(React.js , Spring Boot , Google Gemini API , Postman , Git ,Github)

Developed an AI-powered chatbot application using React.js, Spring Boot, and the Google Gemini API to enable real-time conversational interactions. The system allows users to send queries and receive intelligent, context-aware responses generated by advanced AI models.

The frontend was built with React.js, offering a clean and responsive chat interface, while the backend was implemented using Spring Boot to handle API requests, manage business logic, and securely integrate with the Gemini API. The application follows RESTful architecture and ensures smooth communication between client and server.

2.Car Rental Management System(React JS, Spring Boot, MySQL)

Developed a full-stack web application that allows users to view available cars, make bookings, and manage rentals. The application includes user authentication and role-based access for admin and users, RESTful APIs for handling car, user, and booking operations, and seamless frontend–backend integration using React and Spring Boot. Data is stored and managed in a MySQL database with complete CRUD functionality.

3.CookFlow (React JS)

Created a ReactJS application to display and manage recipes. The project uses React components, hooks, and props to show recipe data and update the UI. It focuses on simple design and user-friendly interaction.
